BULBS

FLOWER SEEDS

for FALL PLANTING of 1919

Observe when Ordering

How to Order. Write plainly your name, town, county and state; giving street number and postoffice box when expedient.

Send all money by postoffice or express money order, bank draft or check, and small sums by registered letter. Postage stamps will be received in sums to one dollar

Order Early. Orders will be filled in the order of receipt, and certain varieties may be sold out if orders are too long delayed.

Special Free Delivery

I will deliver free, all bulbs or seeds listed in this folder when sold at the single or dozen list price provided your purchase amounts to one dollar or over, cash with the order, and your address is within six hundred miles of Los Angeles

Note. The new Federal law which went into effect last June prohibits the importation of Ranunculus, Iris, Ixias, Sparaxis, Anemones and some other bulbs. Of the first four kinds mentioned I have secured a limited stock of local grown bulbs which I am quoting in this list. Of the Anemones there is no local stock yet available and therefore cannot offer any this season.

NARCISSUS

The Narcissus is one of our most beautiful spring flowering bulbous plants, and thrives well in California. Some very desirable effects can be had by planting them in solid beds, and also by planting them among shrubbery and allowing them to become naturalized. They may be planted from the first of October to the middle of January, in any good garden soil, covering the bulbs to the depth of about 5 inches. The polyanthus varieties, of which the Chinese Lily is the best known, also succeed well in water.

SINGLE NARCISSUS

WITH LONG TRUMPETS OR "DAFFODILS"

Emperor. Pure yellow flowers of immense size. Finest of trumpet narcissus. Each, 10c; doz., \$1.00; 100, \$6.00.

Empress. Similar to the preceding, but with a white perianth, and golden yellow trumpet. Each, 10c; doz., \$1.00; 100, \$6.00.

Golden Spur. Large, deep golden yellow flowers. Each, 10c; doz., \$1.00; 100, \$7.00.

SINGLE NARCISSUS

WITH LARGE CUPS

Barrii conspicuus. Primrose yellow, crown orange-scarlet. Each, 10c; doz., 75c; 100, \$5.00.

SINGLE NARCISSUS

WITH SMALL CUPS

Poeticus Ornatus. "Pheasant's Eye." Pure white, the cup edged with crimson. Each, 5c; doz., 60c; 100, \$4.00.

DOUBLE NARCISSUS

Alba plena odorata. Pure white, sweet scented, extra fine. Each, 5c; doz., 60c; 100, \$4.00.

Orange Phoenix. Large, white and yellow. Each, 10c; doz., 75c; 100, \$5.00.

Sulphur Phoenix. White with sulphur yellow center. Each, 10c; doz., 75c; 100, \$5.00.

Paper White Large Flowering. Immense clusters of large, pure white flowers. Each, 5c; doz., 50c; 100, \$3.00.

Chinese Sacred Lily. White with yellow cup; largely used for growing in water. Each, 10c; doz., \$1.00.

JONQUILS—

Much prized for cut flowers, on account of their fragrance and graceful forms. They are easily forced, and also grow well in the open ground. Plant in any good garden soil, covering the bulbs to a depth of about four inches.

Campernelle regulosus. Clear yellow. The largest variety. Each, 5c; doz., 60c; 100, \$4.00.

Double Sweet Scented. Small double flowers. Each, 5c; doz., 50c; 100, \$3.00.

TULIPS

For many years it was considered almost impossible to grow tulips successfully in Southern California, but of late years it has been demonstrated that the late flowering varieties can be grown here with the very best of results. A shady or partially shady situation is preferable, and they thrive best in a sandy soil, well enriched with plenty of rotten manure. The bulbs should be covered about five inches deep, and may be planted from October to January, though early planting is advisable. The Gesneriana Major is the large, late, scarlet tulip seen in many of the floral stores late in the spring and so greatly admired.

DARWIN LATE TULIPS

Each, 10c; doz., \$1.00; 100, \$6.00.

Clara Butt. Soft salmon rose, long stems. A great favorite.

Dream. Beautiful lilac.

Enterpe. Mauve lilac, early.

Glow. Vermilion scarlet, white base with blue markings.

Madame Krelage. Soft rose, margined blush.

Mr. Farncombe Sanders. Dark rosy red, long stems.

Pride of Haarlem. Old rose, immense flowers.

Rev. Euhank. Heliotrope lilac, with paler edge.

Darwin Choice Mixed.

LATE TULIPS.

Each, 10c; doz., \$1.00; 100, \$6.00.

Gesneriana spathulata major. Crimson scarlet with blue black center, sweet scented.

Inglescombe Pink. Rosy pink, tinted salmon.

Inglescombe Scarlet. Intense scarlet, black base.

Inglescombe Yellow. Large canary yellow.

Parisian Yellow. Pure yellow.

Scarlet Mammoth. Large bright scarlet.

Late Flowering Mixed.

HYACINTHS

Hyacinths may be grown in the open ground, in pots, or in glasses, and can be planted from the beginning of October until the end of December.

For the open ground, plant in light rich soil, covering to the depth of 4 or 5 inches.

For pots, plant one in a 5-inch pot, pressing the earth down firmly and leaving one-third of the bulb exposed; then place the pots on the north side of a building or in a cellar and cover with a layer of sand, earth or leaf mould to the depth of about 8 inches; after 4 or 5 weeks unearth the pots and gradually inure to the light.

For glasses, fill the glass with water so as to nearly touch the base of the bulb; place in a cellar or dark place for a few weeks until the roots have grown half way to the bottom of the glass; the water should be changed frequently, care being taken not to injure the roots. A piece of charcoal placed in the water will help to keep it pure.

NAMED HYACINTHS

Each, 20c; doz., \$2.00.

SINGLE RED AND ROSE

Cardinal Wiseman. Rosy pink, fine broad spike.

Moreno. Bright pink, large bells.

Roi des Belges. Bright scarlet, compact truss.

SINGLE WHITE

Albertine. Pure white, early.

La Franchise. Waxy white, large bells.

L'innocence. Pure white, large truss. The best variety; good either for forcing or bedding.

SINGLE BLUE

Charles Dickens. Porcelain blue, large spike.

King of the Blues. Rich dark blue.

Marie. Dark blue.

SINGLE BEDDING HYACINTHS

Each, 10c; doz., \$1.00; 100, \$6.00.

Dark red, pure white, dark blue, or mixed colors.

OXALIS

Charming little plants with pretty clover-like foliage and flowers of various colors; desirable for pots, hanging baskets, window boxes, small beds and borders. For planting in the open ground, place the bulbs four inches apart and two inches deep in any good soil.

Doz., 35c; 100, \$2.00.

Grand Duchess, White. Large, pure white, on single stems.

Grand Duchess, Pink. Large, bright pink, on single stems; compact grower.

Grand Duchess, Lavender. Large, lavender changing to old rose; on single stems.

Bermuda Buttercup. Large flowers, bright buttercup yellow, produced in great abundance; on long stems. Several flowers on a stem.

Mixed Colors.

FREESIAS

A very popular flower and one which does remarkably well in our climate. The bulbs can be planted from August to the middle of November, three or four inches apart and three inches deep. They bloom in February and March; the flowers, which are very fragrant, are largely used for cutting, and last a long time in water.

Purity. Large pure white. Doz., 25c; 100, \$1.50.

New Rainbow Freesias. Various shades of pink, rose, lilac, purple, yellow and lavender. Each, 5c; doz., 50c.

RANUNCULUS

Ranunculus are strikingly beautiful flowers of all shades of color from bright red to pink, yellow and white; very free flowering, pretty for beds and borders. and also useful for cut flowers. They should be planted in rich, well-drained, sandy soil; six to eight inches apart and two inches deep.

Per doz., 50c; 100, \$3.50.

White. Carmine. Yellow. Salmon Red. Orange.
Scarlet. Rose and Mixed.

SPANISH IRIS

Spanish Iris succeed remarkably well in California, and are of the easiest culture. The bulbs may be planted from November to January, in any good, light soil, three to four inches deep and six inches apart. The flowers are on long stems and are almost equal to orchids for richness and variety of color. They last a long time in water and are largely grown by florists for cut flowers.

Each, 5c; doz., 60c; 100, \$4.00.

Alexander von Humboldt. Rich deep blue.

British Queen. White, large flowered.

Cajanus. Golden yellow, long stems.

King of the Blues. One of the best blues.

Louise. White and light blue.

Walter T. Ware. Pale lemon yellow.

Choice Mixed. All colors.

CALLA LILIES

White. (*Richardia Aethiopica*.) "Lily of the Nile." The common Calla Lily. Each, 10c; doz., \$1.00.

Yellow. (*Richardia Elliottiana*.) One of the finest introductions for many years. Flowers fully as large as the white variety, but deep golden yellow; foliage dark green, faintly spotted with white. Each, 25c; doz., \$2.50

WATSONIAS

A beautiful flower from South Africa, and one which thrives remarkably well in our climate; plants grow from three to five feet high, and produce great spikes of large flowers, which are especially valuable for cutting, lasting a long time in water. The plants succeed best in a rich loam, with liberal dressing of well-rotted manure.

O'Brieni. Large, pure white. Each, 5c; doz., 50c.

Pink. Each, 5c; doz., 50c.

LILIES

Lilies require good, rich soil, with thorough drainage, planting the bulbs about five inches deep.

Humboldtii. "Tiger Lily." A beautiful native California lily, growing from four to five feet high, with eight to twelve flowers on a stem; deep orange spotted with maroon; often five to six inches in diameter. Grows in partially shaded places, in rich loam, mixed with decomposed leaves. Each, 25c; doz., \$2.50.

Pardalinum. "Leopard Lily." Flowers earlier than the preceding, reddish orange dotted with maroon, of easy culture. Each, 25c; doz., \$2.50.

Parryi. A rare native California species. Flowers large on leafy stems; trumpet shaped, lemon-yellow, and very fragrant. Grows two to four feet high; requires a moist situation, light sandy soil mixed with plenty of leaf mould. Each, 30c; doz., \$3.00.

CALOCHORTUS

"Mariposa Lily" or "Butterfly Tulip." The flowers are of the most varied and showy colors and resemble a tulip in form. Among the most beautiful of our native plants. The following species grow best in a rather heavy loam, but must have good drainage. Plant four to five inches deep. *C. albus* and *C. amabilis* succeed best in a shady situation.

Calochortus albus. "Fairy Bell" or Lantern of the Fairies." Pendant globular flowers, pearly white, fine for fern beds and shady banks. Each, 5c; doz., 40c; 100, \$3.00.

Calochortus amabilis. "Golden Lily Bell." Pendant globular flowers, clear yellow. Useful for shady banks. Each, 10c; doz., \$1.00; 100, \$6.00.

Calochortus catalinae. "Mariposa Lily." Large handsome flowers, white or lilac with a large maroon spot at the base of each petal. Blooms several weeks before other Mariposas. Each, 10c; doz., \$1.00; 100, \$6.00.

Calochortus venustus oculatus. White or pale lilac with reddish purple spot on the upper portion of each petal. The easiest kind to grow. Each, 5c; doz., 60c; 100, \$4.00.

Calochortus venustus citrinus. Similar to the preceding, but light yellow. Each, 10c; doz., 75c; 100, \$5.00.
